Deities and Slaves Display Rarest Costumes in Dances of Moderns.

In and about an abandoned temple on the Island of Cyprus the gods of india, of Egypt and of Greece gathered last night. After going through their mystic rites, gorgeous in setting and in costume beyond anything this city has ever known, the entire archtoyal party descended from the shades of Cyprus and joined in a round of fox-trotting, one-stepping and waltzing that caused even Terpsichore to stand amazed.

And this dancing diversion, in which Zeus himself and the lowliest slave took part, was not so singular after all, because it was the Ball of the Fine Arts-better still, "The Ball of the Gods"-given at the Hotel Astor by the Society of Beaux Arts Architects for the benefit of its educa-

As a bit of educational work the ball itself was a masterpiece. It showed what an interested band of amateurs could do in presenting a spectacle of mythological pomp and ceremony which made unreal and stagy anything the theatres of the city have ever offered.

In the second place these earnest amateurs had the youth and wealth of society from which to draw their cast for the triology of spectacles. And there is not a name in New York's bluest blue book which was not represented in the cast of characters who strode on that stage last night.

It was distinctly a fashionable cast and it lived up to all traditions in the lavishness with which it cos-

LABOR CLANS PLAN **BIG CONFERENCE IN COAL MINES WAR**

Preceding Meeting of Miners With Operators Here, Union Leaders Will Gather.

A conference of labor leaders which promises to be of far-reaching importance will be held in this city shortly before the meeting of the anthracite coal operators with the offlorate of the United Mine Workers of America at the Hotel McAlpin on

The labor conference will be attended by President White and every district leader of the mine workers in both the bituminous and anthracite districts and by officials of the American Federation of Labor. It was reported to-day the coal operators are determined to face a general strike, rather than grant an advance inwages at present. Within the last forty-eight hours, however, there has been pressure brought to bear to avert a strike.

In labor circles it is asserted that the Rev. Dr. John A. Ryan, of the Catholic University staff, was asked to', serve as chairman of a proposed board of arbitration, organized along the lines of the one that settled the waist and dress industry dispute. Many district leaders of the miners' organization favor such a plan, if the operators will agree to sign an agreement to abide by the decision of such a board. This will be one of the subjects brought before the labor conference now being planned. The executive board of the miners is said to be strongly opposed to any board of ar-bitration, holding that the differences between the miners and the operators ought to be settled by the parties directly interested.

directly interested.

The Anthracite Coal Operators' Committee, of which S. D. Warriner is chairman, issued another statement to-day giving schedules of the cost of anthracite from the mines to the consumer. The retail cost, at present, according to this statement, is \$7.25 a ton. The actual labor cost per ion is \$1.80. It costs, on an average, \$1.55 a ton for freight. The statement admits that at some mines the cost of labor is less and there is, therefore, a correspondingly larger profit to the operators. The statement adds that an increase of 20 per cent, to the miners would add \$23,000,000 a year to the pay roll.
